# SYED TASHRIFUL ALAM

## Software Engineer

Software engineer building full-stack web products with TypeScript, Next.js and PostgreSQL. Computer Science & Engineering graduate from North South University, working at Codemoly since February 2026, where I have shipped over 300 commits across five production codebases — a multi-vendor marketplace, a garments manufacturing ERP and an advertising operations platform I built almost end to end. Comfortable owning a feature from database schema through API to interface. Seeking an entry-level Software Engineer position in Dhaka.

## Work Experience

### February 2026 – Present

#### Codemoly

##### Software Engineer

*Joined as Software Engineering Intern (February – May 2026)*

- Shipped **300+ commits across five production client codebases** built on Next.js 16, React 19, TypeScript and PostgreSQL.
- Principal developer on an advertising operations platform — authored **74 of its 87 commits**, covering the admin client console, wallet and treasury handling, bulk exchange-rate overrides, realtime support ticketing and a date-ranged finance report with PDF export.
- Built role-based dashboards for a garments ERP spanning 66 modules: KPI cards, order-trend and status charts, responsive sparklines, an app-wide theme customiser and Excel report exports.
- Delivered storefront and vendor-console features for a multi-vendor marketplace built as a monorepo of 5 applications and 14 shared packages.
- Integrated REST APIs with Zod-validated contracts and role-aware authorisation enforcing tenant data isolation.
- Worked in a reviewed pull-request workflow with conventional commits, inside a CI pipeline gating formatting, linting, type-checking, unit tests and end-to-end suites.

## Projects

### Softmart — Multi-Vendor Marketplace Platform

TypeScript · Next.js 16 · PostgreSQL · Drizzle ORM · Vitest · Playwright · Turborepo

- Contributed **70+ commits** across the storefront, vendor console and versioned REST API of a pnpm/Turborepo monorepo.
- Built the storefront header and hero, a scannable product specifications table and the buyer account area; added seller reporting and order-dispute views to the vendor console.
- Worked in a codebase covered by **190+ test files** and Playwright end-to-end suites.

### RMG ERP — Garments Manufacturing System

TypeScript · Next.js 16 · PostgreSQL · Drizzle ORM · Recharts · ExcelJS

- Contributed **95 commits** across procurement, planning, shipment, cutting and shop-floor modules of a tenant-aware ERP for export garment factories.
- Built the role dashboards every department lands on, each driven by its own domain data, plus Excel exports for daily production reports.

## Academic Projects

**ResearchGPT** — multi-agent system that coordinates retrieval, outlining, drafting and citation agents to produce structured research writing. Python · LLM APIs · NLP

**U-Net Multi-Organ Segmentation** — convolutional network segmenting multiple organs from abdominal CT images across varied scan quality. Python · Deep Learning · Medical Imaging

**Diabetes Prediction Model** — supervised model estimating diabetes risk from patient health indicators, feature engineering through evaluation. Python · scikit-learn · Data Analysis

## Education

**B.Sc. in Computer Science & Engineering** — North South University 2022 – 2026

**Higher Secondary Certificate (HSC)** — Shaheed Police Smrity College, Dhaka 2020

**Secondary School Certificate (SSC)** — Adamjee Cantonment Public School, Dhaka 2018
